About me 🚀

**AI Enthusiast**

Data Scientist

Problem Solver

I am Ariella Asti Cahyani, a Computer Science student with a deep curiosity for how technology and data can address human-centered challenges. My passion lies in transforming complex problems into meaningful solutions, blending empathy, analytical rigor, and innovation.

I believe the most impactful breakthroughs happen where human needs meet data insights and future-driven technologies. Beyond coding, I care about asking the right questions and uncovering the "why" — so every solution I build truly matters.

Experience

Innovation Associate
Skilvul x Ocean Kita | Mar 2025 - Jul 2025
BISA Program
- Developed circular economy initiatives, contributing to measurable reduction in local pollution levels.
- Built and maintained a database system to monitor 18,000 kg of coastal waste and track project impact.
- Launched gamified education programs that increased community engagement among 1,000+ beneficiaries.

Exchange Program
Chung Yuang Christian University (Taiwan) | Feb 2025 - Jun 2025
Data Specialization with R
- Achieved top-performer distinction in CYCU's Overseas Cross-Enrolment Program, demonstrating excellence in advanced data analysis and problem-solving.
- Developed strong end-to-end data analysis skills—from statistical modeling and hypothesis testing to creating compelling data visualizations—using R to generate actionable insights.
